PROFESSIONAL SUMMARY

Entry-level Software & AI Engineer with hands-on experience building Python, REST APIs, FastAPI, AI/ML solutions at Munshi.AI. Proven foundation in backend API development, data pipelines, and machine learning architectures, seeking to contribute to Devsinc's engineering initiatives as a Qa Automation Engineer in Lahore, Pakistan.

TECHNICAL SKILLS

Languages & Core: Python

Frameworks & APIs: REST APIs, FastAPI

AI / Machine Learning: AI/ML, RAG, Agentic Systems

Databases & Tools: Git, SQL, PostgreSQL

KEY PROJECTS

AI/ML FYP | *Python, PyTorch, FastAPI, Git, Machine Learning*

- Implemented baseline agentic models and evaluation benchmarks.
- Engineered RESTful backend APIs using Python and FastAPI for model inference and tracking.

Backend Inventory Management System | *Python, SQL, PostgreSQL, FastAPI*

- Designed normalized relational database schemas and indexed SQL queries for inventory records.
- Engineered high-performance RESTful API endpoints for transaction tracking and inventory updates using FastAPI.

PROFESSIONAL EXPERIENCE

AI/ML Engineer - Munshi.AI *(2025-06 - Present)*

- Developed resilient backend service pipelines using Python and FastAPI for Munshi.AI, ensuring high availability.
- Developed RESTful backend APIs using Python and FastAPI for Munshi.AI, supporting high-throughput request handling.
- Collaborated on experimental LLM retrieval mechanisms and RAG pipeline architectures for Munshi.AI.

EDUCATION

Bachelor of Science in Computer Science - University in Lahore, Lahore, Pakistan
